## Summary

I am a Full-Stack developer with +3 years of experience with building web applications and servers. Most of my project's stack is MERN stack, React for building reusable and interactive UI components, Nodejs to run my server code and handle database's connections, Expressjs to manage my server and routes, MongoDB or MySQL for database.

While I keep busy teaching courses and writing content on Medium, Dev.to and Twitter, I still take interviews in search of a great team & projects that interest me.

## Experience

### Websites and web app Developer

freelance

Jun 2019 - Present (3 years 1 month +)

## Education

### AI-Neelain University

Computer Science

2019 - 2024
